Learning piano

Buy a piano

Electronic piano is a very cheap instrument that does not require a teacher, listening otherwise.

Learning piano

Buy a piano

The digital piano costs 100 € for beginners.
The upright piano or the living room organ are
instruments to maintain.

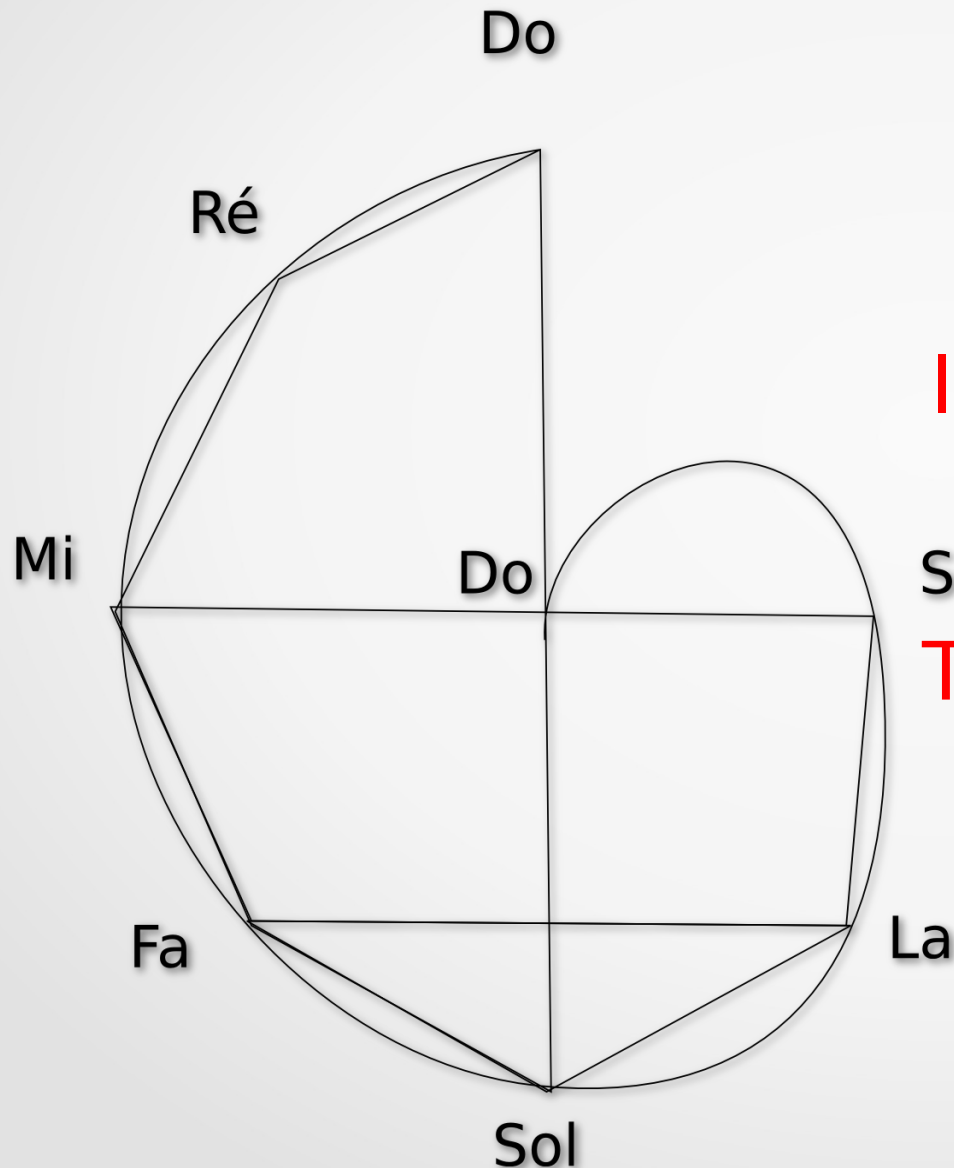

Learning piano

Buy a piano

Don't forget to choose a good, soft stool.
The stool does not need to be wide for the digital
piano.

Don't forget the manual if you don't want
improvising.

Learning piano

Playing piano

If you want to improvise,
You have to know
Si This notes' range.
Try to recognize them on
the piano.

Learning piano

Playing piano

If you want to use music theory, go to a music theory class at the conservatory, for example.

Then you can get your own piano teacher.
But music theory may be enough for the first year with a textbook.

Learning piano

Recognize the keys

The piano keys range from the lowest on the left to the highest on the right. We see that notes are repeated every eight tones. So we see four white notes associated with three black notes, followed by three white notes associated with black ones. A black key is a semitone. To that's seven whites, the first of which is the C and the last is the D.

Learning piano

Recognize the keys

The white keys are beautiful, very clear notes. They are very harmonious. The C begins and ends the piano. The black ones are the sharps or the flats. The sharp is a note half a tone above. The flat is a semitone below. As the notes are separated by a very clear tone, a flat on the top is alike to a flat on the bottom.

Learning piano

Recognize the keys

The C and the G are alike. The C is the first of the white notes to the left of the three black notes, which are the sharps or the flats. The C sharp is the black key on the right. It is a little more acute. The G is the first of the white ones starting the two black ones next to each other. The G sharp is the black note above.

Learning piano

Recognize the keys

The F and the A are similar. They ask the listener for a suite. The D too but less so. The F is the last of the white ones below the three black ones. The A is the white note that follows the G. The sharps are the black ones above on the right. The flats are the black ones above on the left.

Learning piano

Play music

At first, we only play with one finger to look at the keys. Very quickly we have to use our whole hand with traditional music. Then we learn with both hands with the prelude and fugue in C major by Bach. So we learn with both hands with Beethoven's letter to Elise.

Learning piano

Tips

Also learn another instrument or change from your digital piano. This is less restrictive. We want to move from one instrument to another.

Learn the great classical music themes to create beautiful right away.

Play piano without sound to recognize the notes easier.

Sing to learn faster.

Learning piano

Conclusion

The piano allows to learn music theory with a simple manual. It is important to memorize to assimilate the instrument well. Then we can learn to play at the same time as we read the score.
